 New Zealand

Dear Hiring Committee,

I am eager to apply my 12+ years of experience in ASP.NET, C#, VB.NET and Python to a dynamic development role. With a strong background in building reliable software solutions, I am excited to contribute my technical skills to innovative projects.

At SBS Transit Ltd, I developed web and mobile applications, working with teams to deliver high-quality systems under tight schedules. My ability to solve complex problems and adapt to challenges ensured successful project outcomes. As a Software Team Leader at Justlogin, I improved products through Agile processes, sharpening my skills in delivering efficient solutions.

Currently pursuing a Master of Artificial Intelligence at Victoria University of Wellington (expected completion: October 2025), I bring cutting-edge knowledge alongside my Master's in Information Systems from Nanyang Technological University, Singapore. My expertise in ASP.NET, C#, VB.NET, Python and other technologies makes me ready to excel in development roles.

Enclosed is my CV, and I invite you to explore my portfolio at https://leafy-kitten-54d58f.netlify.app/ for more details on my work. Thank you for considering my application. I look forward to discussing how my skills can support your team's goals.

Yours sincerely,

Hnin Wit Yee
